9. **Nature and Extent of Involvement of Faculty and Students in Academic Affairs / Improvements**

(a) **The Philosophy behind Faculty Student Involvement:**

The University has been concentrating on Education, Training & Research in areas of Information Technologies, Biotechnology, Civil Engineering and IT-enabled Services. These are globally recognized as emergent areas of rapid growth in the next two decades. India is already recognized as a source and repository for highly trained manpower in IT related areas and is fast developing in Biotechnology applications. Graduates will have ample opportunity for employment in all these areas, and in contributing to

national prosperity and global competitiveness of Indian industry. The University is committed to developing excellence in education, training and research. Institutionalized attempts are being made to promote and foster excellence in developing knowledge, learning and problem solving skills in all our students with positive attitudes and commitment to values in every student, faculty and staff.

- (b) At JUIT, special emphasis has been placed on developing an environment highly conducive to building of a solid foundation of knowledge, personality development, confidence building, pursuit of excellence, self-discipline and enhancement of creativity through motivation and drive, which helps to produce professionals who are well trained for the rigors of professional and social life. All Students are encouraged to make life outside the classroom vibrant and enjoyable by engaging themselves in multiple extracurricular areas. Fun creativity, competition, distinction, establishing relationships with fellow students and others in the community and ultimately enhancing the value of their educational experience, is at the heart of all extracurricular activities.
- (c) Concept of Faculty Involvement: The faculty focuses on mentoring, guiding and counselling the students for strengthening their critical thinking, problem solving, analysis, design, team work, communication skills and preparing students for life long learning. The faculty uses innovative techniques, interactive lectures, guided case studies, literature survey, regular lab assignments, project work for critical and creative thinking. As a pedagogical practice starting from first year courses itself, students are required to explore, study, summarise, critique, validate and evaluate classical as well as current research literature published by eminent research publishers. The faculty stresses on learner centric, active and collaborative learning. Labs are used for developing skills to use and apply various theoretical concepts with professional competence. Every student has to undertake a Course project in each course to help him learn the knowledge application aspects of the course.
- (d) Each Department lays down Departmental visions, objectives and roles in shaping the profile of the graduates. These are discussed, validated and converted in curricula and teaching practice to achieve the desired goals. Thus every course has well defined outcome objectives that are quantified through the assessment process.
- (e) Faculty Development Programme(s) - JUIT believes in continuous training and development of its staff and teachers. The faculty is both multi-skilled and field specialized. Each year JUIT organizes FDPs to impart to its faculty the lessons in professionalism and pedagogy for improving the quality of teaching. The concept of treating students as a customer and caring for them assists the faculty in getting feedback and incorporating necessary improvements. Faculty Development Programme-Emphasizes on course preparation, lecture, tutorial and laboratory delivery, assessment techniques and obtaining feedback. This is undertaken through specific lectures by senior colleagues, followed up by 'demo sessions' and participation in coordinated work groups. At the end of every program, there is a review session along with interaction with Assessment Committee Members

- (f) Symposiums / Interactive Sessions / Seminars / Lectures / Presentations are frequently organized; both inhouse and by inviting eminent external speakers to improve the quality of knowledge and skills and contribute to the knowledge as also the developmental effort of the State & the Country.
- (g) Students are encouraged to explore the environment through participation in professional / curricular / co-curricular activities outside the University.
- (h) System of student mentoring has been put in place. Feedback is analysed at Departmental levels as also during meetings of various fora as to imbibe and include new and valid suggestions.
- (i) Faculty is encouraged for undertaking R&D projects and do research to upgrade their knowledge and contribute to the knowledge generation as also the developmental effort of the State and the Country.
- (j) Faculty is supported through financial incentives to attend conferences / make oral presentations / attend seminars and submit the reports, which are shared in the department for mutual benefit and enhancement of knowledge.
- (k) Students have formed a Youth Club called JYC, this is the sole student body of the college, which believe in furthering the development of the students as a whole, and strive to provide a climate that nurtures the holistic development of our students, an environment that is trusting and spontaneous; and encourages flexibility, celebration and recognition. This is achieved through annual cultural, technical fests, various events, parties, treks, outings and other spontaneous activities to maintain high levels of enthusiasm and team integration. Focusing on technical, literary, sports, and cultural competitive activities, apart from serving as a retreat from intense academic loads, these extracurricular activities present situations with opportunities that build confidence, encourages teamwork and gives students a strong sense of achievement and belonging. The motto followed by them is "We're looking for commitment and passion for activities outside of the academic setting we're looking for depth rather than breadth."
- (l) Student profiling is undertaken in association with internal and external agencies to draw out the strengths of each student for guiding them in placement, entrepreneurship and research as per their aptitude.

10. **MECHANISM / NORMS & PROCEDURES FOR DEMOCRATIC / GOOD GOVERNANCE**

The University has developed following methods:

40. Laboratory:

(1) IT Infrastructure Centre

The main objectives of the Server Room ( IT Infrastructure Center) are to provide support to all the members of JUIT on all aspects of academic computing, to implement and maintain IT infrastructure and application software, to impart introductory and advanced instructions to users, generate trained manpower to maintain IT infrastructure ( Servers, Desktops, Network, Projectors, Printers, UPS, Wi-Fi, sound system, scanner etc.), to provide support to institute computerization efforts, to do in house research & development, and to serve a user population of more than 2500 users consisting of undergraduate students, postgraduate students, research scholars, faculty and staff of the University.

In addition, it also owns the responsibility to develop and implement application software for various needs of the JUIT like finance, payroll, results, MIS reports and electronic attendance system etc.

- General Computing Facilities

The Server Room is equipped with IBM X series Server for high performance Unix Computing Server, Intel Xeon servers with multiple processors, High end Intel Pentium server with multiple processors, various engineering and technical computing software, network management tools, Client/Server Database computing system connected over a switched fast Ethernet with Optical fiber backbone.

For our printing needs we have total 61 printers with 12 heavy duty Network Printers and 1 Line matrix printers.

- **DATABASE SERVICES**

The Server Room has a Client/Server Database Computing System – Oracle 11g with Developer 2000 version 6.0 at front end, the platform is windows NT/2000/2003.

- **NETWORK SERVICES**

The University Local Area Network (LAN) is a state of the art Managed and switched network with Fiber Optical and enhanced CAT5e/CAT6 UTP Backbone. It consists of more than 3500 network access points spread using 73-3 com switches, 3 Cisco Routers, 15 Cisco switches, 17 Cisco AP and 15 VLANs.

The network access is provided to every room in student's hostel, faculty & staff residence, doctors at JUIT hospital, mess, laboratories and rooms in guest houses.

Internet connection has been provided through a router. We have 1 Gbps (1: 1) leased circuit from BSNL and Railtel (4 MBPS) on OFC. Apart from internet and intranet many more services including mail, web, and library book search, domain name, antivirus and software upgrades are being provided over this network.

JUIT is using Cyberoam Suite to manage internet bandwidth and mailing services. Cyberoam consists of software firewall, anti spam controller, content filtering and antivirus protection at gateway level. Lotus Domino Package is being used by JUIT for official mailing and other corporate services.

TEACHING LEARNING PROCESS

41. Teaching Learning Process :

**Project Based Learning**

To train the students in applying the knowledge acquired in each course and to understand and develop the problem solving skills, every student has to complete a minor project in each course and then at the end of the program has to complete a major project with 20 credits.

**Group & Self-Learning**

This is a very effective means towards preparing professionals who are proactive in seeking and acquiring knowledge rather than having it imparted only in the classroom. Free exchange of ideas among the group members through discussions and presentations not only leverages on time effort but also enhances teaching and communication skills. Every course syllabus has a list of URL's from where the student can get additional content and learning resources. This encourages the student to explore, learn & expand the classroom teaching and also equips them to enhance self learning capabilities. Aptitude is developed for self-study and use of web resources and data banks to foster life long learning.

**Problem Solving Exercises**

Problem solving is an integral part of the teaching-learning process. Lectures emphasize this aspect through carefully set, open-ended design problems. Students are organized in small groups where an opportunity is provided to do problem solving, engage in design exercises, and perform information search and processing.

42. Academic Calendar of the University :

Please visit the link for detail:

Academic Calendar 2016-17

Academic Calendar 2017-18

<http://www.juit.ac.in/attachments/AcademicCalendar2017-2018.pdf>

43. Internal Continuous Evaluation System :

The teaching-learning process :

It is to develop a number of qualities in students. These are as follows:

- Sustained Disciplined Work

Since the University uses multidimensional assessment model which demands that the teacher provides students the opportunity to participate in quizzes, R&D seminars, tests and assignments throughout the semester hence the ability to put in sustained and disciplined hard work over the entire length of semester is one of the key factors to success in professional life. A typical semester is designed in an intensive and a

modular fashion with an emphasis on regular and continuous work. The Evaluation System (see section 3) is designed to encourage this concept.

- Self Learning

In its attempt to move away from teacher-centered learning to student-specific learning, the curriculum actively encourages self learning. For this purpose 15% of the time allotted to theory and tutorial classes is specifically earmarked for independent study. That is, Self learning time per course = (theory time + tutorial time)\*0.15

- Flexibility in Pace of Learning

The evaluation system makes special provision for different paces of learning for different students. Yet, it attempts to inculcate respect for deadlines. Thus, while specifying a time limit within which tutorial/practical work must be completed, there is scope to submit such work beyond the deadline. However, there will be a small penalty for late submission. The faculty will notify of the penalty for late submission for each tutorial/practical session and also the time up to which late submissions will be accepted.

- Design Orientation

The curriculum is structured so that basic implementation skills and design skills are interwoven together. Thus, for example, a student of Programming Systems learns not only how to program but also how to design programs (The teaching-learning process structures a course in the two levels of implementation and design).

- Quality Consciousness

Students are made to be aware of the importance of continuous improvement, building zero-defect products and doing quality work. All courses emphasize on quality as an integral part of teaching the various standards and how they are used. Students are taught how to test and certify their laboratory work and how to evaluate the worth of theoretical results.

- Co-operative Working

Given the complexity of technological problems of today, large multi-disciplinary & multi domain teams work together to provide solutions. Thus, it is very important to learn group dynamics and to work in teams. Through co-operative project work wherever possible, the Institute encourages students to learn to select teams, resolve leadership and group issues and in general, to make effective operational process based work & activity models.

- Evaluation System :

**(A) Theory Courses**

Examination	T-1	T-2	Make Up	T-3
-------------	-----	-----	---------	-----

Total Marks	15	25	25	35
Duration	1 Hour	1 Hour 30 Minutes	1 Hour 30 Minutes	2 Hours

There shall be three Examinations. These shall have a total weight age of 75%; the balance 25% shall be allocated to Assignments, Quizzes, Homework, and Regularity in Attendance and Tutorials etc. by the Course Coordinator/Respective Teacher. Allotment of marks, duration of each Examination and coverage of Syllabi will be as under:-

Syllabi Coverage:

- (i) T-1 Exam: Syllabi covered up-to T-1.
- (ii) T-2 Exam: Syllabi covered up to T-2.
- (iii) Make up Exam: Syllabi covered up to T-2.
- (iv) T3 Exam: Full Syllabi.

Teachers Assessment: 25 marks

### **(B) Practicals.**

The evaluation of Practical / Laboratory / Workshop work will be based on following:-

- (a) Day to day work.
- (b) Punctuality and Regularity.
- (c) Quantity and Quality of work.
- (d) Some practical tests.
- (e) Any other component to be decided and announced by the teacher(s).

**Evaluation of the practical/lab courses/workshop shall be as follows:-**

- (a) Day to day work 60%: Break-up of Day to day work will be as follows
  - (i) Attendance 15%
  - (ii) Quantity & Quality of Experiments including Performed, Learning laboratory Skills and handling Laboratory Equipment, Instruments, Gadgets, Components, Materials and Software etc. 30%
  - (iii) Laboratory record 15%.
- (b) Mid-Semester lab-viva/test 20%
- (c) End Semester lab-viva/test 20%

### **(C) Projects (Major)**

(a) Students are required to register for the project as specified in the Academic calendar. The credits to be registered in each semester, if the project runs for more than one semester, shall be governed by the approved curricula.

(b) Following evaluation scheme to be followed in each semester while evaluating and awarding grades:-

- (i) Day to day work 30% awarded by the Supervisor(s).
- (ii) One Mid-Term Seminar on the project work for 20 minutes followed by Viva-Voce Examination (between T1 and T2 Exam), 25% awarded by a panel.

- (iii) Project Report/Thesis 20% awarded by the Panel.
- (iv) Final Viva-Voce 25% awarded by a panel of three teachers including Supervisors.
- (v) In case of M.Tech programs, External Examiner shall form the part of panel.

(c) Guidelines for Monitoring and Evaluation of Projects: Quality of project work will be based on student's meeting and holding discussion with the supervisor. Enthusiasm, zeal and the work put in by the candidate. Systematic and scientific approach to the work followed by the candidates. Hence

- (i) The students must meet their supervisors immediately after the lists of projects assigned to them are displayed and commence their projects.
- (ii) The students must meet and report to their supervisors at least twice a week on appointed days and time.
- (iii) The students should maintain a logbook of their day to day activity and get it signed by the supervisors twice a week during their meetings.
- (iv) There should be regularity and timeliness of interaction with the supervisor.

(d) The final evaluation of the M.Tech project (i.e. at the end of 4th semester) shall be carried out by a committee consisting of Supervisor, HoD or his nominee and an external expert. The evaluation at the end of the third semester shall be carried out by a committee consisting of Supervisor, HoD or his nominee and a nominee of Dean-A&R.

(e) Distribution of Marks at the end of Third Semester

- (i) Day to day work to be awarded by Supervisor - 40 Marks.
- (ii) End Semester Evaluation by a panel of Examiners (Report, Presentation and Viva-Voce) - 60 Marks

(f) Evaluation during and at the end of Fourth Semester.

- (i) Day to day work to be awarded by Supervisor - 30 Marks.
- (ii) Mid Semester evaluation between T1 & T2 by Panel - 20 Marks of 2 examiners (Supervisor and nominee of HoD).
- (iii) End Semester Evaluation by a panel of Examiners (Report, Presentation and Viva-Voce) - 40 Marks.
- (iv) Significant/Special contribution to be awarded by Panel of examiners - 10 Marks.
- (v) The following may be considered for significant/special contribution: Paper publication or publication of good quality, Practicality/novelty of the Theory, Model, Product or Design etc. Note: A+ Grade for project work may be awarded only if high quality significant contribution is made by a candidate in dissertation work and in all such cases that contribution should be highlighted in the examiners' report. (Separate Grades will be awarded at the end of Third and Fourth Semesters)

#### **(D) Industrial Project**

- (i) B.Tech students who proceed to work in last semester of their program for completing their Project in Industry shall be allotted an External Supervisor from the industry/organization in which they work for their project.

- (ii) The External Supervisor from the industry/ organization shall be appointed by the appropriate authority of the industry/organization and communicated to HoD concerned and Dean (A&R) in the beginning of the semester.
- (iii) External Supervisor shall work on the problem identified and the work plan for the semester defined by the External Supervisor for the Industrial Project work.
- (iv) The External Supervisor and the candidate shall always remain in touch. The evaluation of the industrial project shall be done by the External Supervisor and the marks/grade awarded to be forwarded to the HoD concerned of JUIT.

### **Grading.**

- (a) Structure of Grading of Academic Performance

The following shall be the structure of grading for academic performance of the students:

<b>Grade</b>	<b>Point</b>	<b>Description of performance</b>
A+	10	Outstanding
A	9	Excellent
B+	8	Very Good
B	7	Good
C+	6	Average
C	5	Below Average
D	4	Marginal
F	0	Very Poor
NP	-	Audit Pass
NF	-	Audit Fail
W	-	Withdrawal
X	-	Continued Project

- (b) Students obtaining grades A(+) to D, shall be declared pass. Students failing in the subject, will be awarded F grade.
- (c) The grades shall be decided on the aggregate of evaluation of all the components like:-
  - (i) written Examinations
  - (ii) Assignments Quizzes, homework, tutorials and regularly in attendance etc (A).

### **Attendance Requirement.**

- (a) A student is required to attend all the classes.

- (b) If the attendance profile of a student is unsatisfactory, he/she will be debarred.
- (c) Absence during any tests, for any reason, is at student's, own risk and loss

### **Showing of Answer Scripts.**

The answer scripts of all examinations is shown to the students. Students desirous of seeing the marked answer scripts of final examination, has to ensure their presence before results are declared, as per dates notified in the Academic Calendar.No appeal is accepted for scrutiny of grades after that date.

44. Student Assessment of Faculty : System in Place on-line and the feedback so obtained for the course, teaching-learning environment and teachers note is used to improve the curricula on a continuous basis.

The system of interaction of students, HODs and Vice Chancellor either directly or through counsellors have proved effective in management of issue.

45. Research Activities

The University has a large focus on R&D and has started from its very inception to encourage faculty members to engage in research. The University is a recognized “Centre of Excellence” by DBT and assisted by DST under FIST. It has also been rated as the No. 1 Biotechnology Department in India among the private Universities.

At the University, a “Computer Communication Research Group” (CCRG) has been set up. The CCRG is dedicated to basic and applied research in computer communication. Research focuses on new algorithms, protocols, and architecture for wireless networks based on packet switching (i.e. packet-radio networks), internetworking, multipoint communication, and the control of resources by multiple administrative authorities.

#### **Wireless Networks, Channel Access and Mobile Computing**

The Group is developing new algorithms and protocols for wireless networks based on packet switching, i.e. packet-radio networks. A multi-hop packet-radio network is an ideal technology to establish an “instant communication infrastructure” in disaster areas, which support Indian military needs, and extend the global communication infrastructure to the wireless mobile environment.

The research problems being addressed include channel access, routing, multicasting, congestion control, topology management, end-to-end reliable communication, and security.

#### **Internetworking**

Internetworking technology has been tremendously successful. As the Internet continues to evolve, today's internetworking technology is challenged by growth, the provision of multiple types of services at varying speeds, the support of collaborative environments that require real-time multipoint communications, the control of resources by multiple administrative authorities, and the interoperation of different types of high-speed internets.

Research problems being addressed in this area include scalable routing architectures and protocols, scalable multicast routing, end-to-end reliable multicasting, and security.

#### Multimedia Collaboration

Ultimately, computer communication research aims at supporting and augmenting people's ability to communicate, coordinate, and collaborate remotely, using online tools and information in a distributive manner.

The Group is developing new protocols and middleware for group coordination and distributed multimedia resource allocation, augmenting tele-collaboration and distance learning.

Future plans for new courses include starting a UG and PG program in Biotechnology, relevant PG (M.Tech.) courses in the disciplines of Electronics & Communication, Computer Science & Engineering and Information Technology, Bioinformatics, and Civil Engineering.

### **INNOVATIVE PROGRAMS**

- (i) The University has been introducing many new concepts and techniques in pedagogy as also in the ICT applications in Education, Training & Research using State-of-Art Information & Communication Technologies, Bioinformatics/Biotechnology, and IT-enabled Services. These are globally recognized areas of rapid growth in this decade. India has been already recognized as a source and repository for highly trained manpower in IT, ITeS and related areas and is fast developing in Bioinformatics/Biotechnology applications. Our Graduates have been excelling in all these areas, and in contributing to national prosperity and global competitiveness of Indian industry.
- (ii) JUIT is committed to developing excellence in education, training and research through innovative process and methodologies. Institutionalized attempts are being made to promote and foster excellence in developing knowledge skills and attitudes in all students and commitment to values in faculty and staff.
- (iii) Faculty Development Program - Conducted once every year with emphasis on outcome based course preparation, lecture, tutorial and laboratory delivery assessment techniques, and feedback based continuous upgradation of course contents pedagogy and assessment methodology is yielding encouraging results. . This is undertaken through specific lectures by senior colleagues, followed up by 'demo sessions' and participation in coordinated work groups. At the end of every program, there is a review session along with interaction with Experts.
- (v) Student Profiling - Undertaken in association with Internal & External Agencies, build on the strengths of each student.
