(iii) The B.Tech Academic System

A) **ACADEMIC QUALITIES**

The teaching-learning process aims to develop a number of qualities in students. These are as follows:

(a) **Sustained Disciplined Work**

The ability to put in sustained and disciplined hard work over a sufficient length of time is one of the key factors to success in professional life. A typical semester is designed in an intensive and a modular fashion with an emphasis on regular and continuous work. The Evaluation System is designed to encourage and support this concept.

(b) **Self Learning:**

In its attempt to move away from teacher-centered learning to student-centered learning, the curriculum will actively encourage self learning. For this purpose 15% of the time allotted to theory and tutorial classes will be specifically earmarked for independent study. That is, Self learning time per course = (theory time + tutorial time)\*0.15

(c) **Flexibility in Pace of Learning:**

The evaluation system makes special provision for different paces of learning for different students. Yet, it attempts to inculcate respect for deadlines. Thus, while specifying a time limit within which tutorial/practical work must be completed, there is scope to submit such work beyond the deadline. However, there will be a small penalty for late submission. The faculty will notify the penalty for late submission for each tutorial/practical session and also the time up to which late submissions will be accepted.

(d) **Design Orientation:**

The curriculum is structured so that basic implementation skills and design skills are interwoven together. Thus, for example, a student of Programming Systems learns not only how to program but also how to design programs (The teaching-learning process structures a course in the two levels of implementation and design).

(e) **Quality Consciousness:**

Students should be aware of the importance of continuous improvement, building zero-defect products and doing quality work. All courses will emphasize on quality as an integral part of teaching. Students will be taught how to test and certify their laboratory work and how to evaluate the worth of theoretical results.

(f) **Co-operative Working:**

Considering the complexity of technological problems of today, it is considered that large teams work together to provide better solutions. Thus, it is very important to learn group dynamics and team work.

**B) THE COURSE DESCRIPTION**

(a) At the beginning of each semester, the course coordinator/teacher concerned will circulate the Course Description of the course on the first day of the start of the semester to motivate the students for the course and will comprise of the following:

- (iv) Learning Outcomes/Course Outcome
- (v) Course Outline
- (vi) Pre-requisites, if any
- (vii) Teachers Assessment (TA) Evaluation Methodology
- (viii) Detailed Syllabus.
- (ix) Text and Reference Books.

1. Award of Grades

- i. Students obtaining grades A(+) to D, shall be declared pass.
- ii. Students failing in subject will be awarded F grade.

2. The grades shall be decided on the aggregate of evaluation of all the components:

- i. For theory: Aggregate of Three written tests, T-1, T-2, T-3 and Teachers Assignments
- ii. Laboratory Courses: aggregate of day to day working and term exams
- iii. Major Projects shall be evaluated & graded as given **Annexure I**

1. The following shall be the structure of grading for academic performance of the students:

Grade	Point	Description of performance
A+	10	Outstanding
A	9	Excellent
B+	8	Very Good
B	7	Good
C+	6	Average
C	5	Below Average
D	4	Marginal
F	-	Very Poor
NP	-	Audit Pass
NF	-	Audit Fail
W	-	Withdrawal
X	-	Continued Project
I	-	Incomplete

2. Description of Grades

A Grade

An “A+” grade stands for outstanding achievement. The minimum marks for award of an “A+”

grade is 80%. However, individual course coordinators may set higher marks requirement.

#### B and C Grades

“B” and “C” grades denote performance ranging from Very Good to Below Average. These are decided based on the relative performance of students. Generally two methods are followed for relative grading: (i) Normal distribution method for number of students greater than 30. (ii) Absolute grading method for number of students less than 30.

#### D Grade

The “D” grade stands for marginal performance; i.e. it is the minimum passing grade in any course. The minimum marks for award of “D” grade are 30%. However, individual course coordinators may set a higher marks requirement.

#### F Grades

“F” grades denote very poor performance, i.e. failing a course. A student has to repeat all compulsory (core) courses in which she/he obtains “F” grades, until a passing grade is obtained. For the other (elective) courses in which “F” grades have been obtained, the student may take the same course or any other course from the same category.

#### W Grade

The “W” grade is awarded to a student if he/she is allowed to withdraw for an entire Semester only if he/she has been on authorized absence from the University on medical grounds for a period exceeding five weeks.

#### X / I Grade

The “X”/“I” grade is awarded for incomplete project work/course, at the end of a semester. Subsequently, it is converted into a regular grade upon completion of the project work /course and its evaluation.

### **EVALUATION OF PERFORMANCE**

The performance of a student will be evaluated in terms of two indices, viz., the Semester Grade Point Average (SGPA) which is the Grade point Average for a semester and Cumulative Grade Point Average (CGPA) which is the Grade Point Average for all the completed semesters at any point in time. The SGPA is calculated on the basis of grades obtained in all courses, except audit courses, registered for in the semester.

$$= \frac{\sum G_i C_i}{\sum C_i}$$

where  $C_i$  = Credits of the registered subject

$G_i$  = Grade point awarded to the student in the registered subject

s = Total number of registered subjects in the semester, except audit Courses

The overall Grade of a student in the program of study upto the end of a particular semester shall be called Cumulative Grade Point Average (CGPA). CGPA shall be calculated on the basis of all grades, except audit courses, obtained in all completed semesters as follows:

$$= \frac{\sum_{i=1}^n G_i C_i}{\sum_{i=1}^n C_i}$$

where C<sub>i</sub> = Credits of the registered subject

G<sub>i</sub> = Grade point awarded to the student in the registered subject n = Total number of registered subjects, except audit Courses. An Example of these calculations is given below:

#### Semester-I

### CONVERSION OF GRADES INTO PERCENTAGES

The performance of the student is measured in terms of CGPA (on a 10 point scale) as defined above. However, on request from the Indian Industry and overseas Universities querying on percentage obtained by students, a mathematical formula for conversion of GPAs to equivalent percentage has been adopted and same is approved by the Academic Council of the University. This chart is applicable till the admissions of academic session 2012. Further, it has been decided to modify the system of calculation of CGPA from admission session 2013 onwards in that the equated percentage shall be equivalent to CGPA x 10.
