

Report on one-day outreach event organized at St. Edward School, Shimla on 12th September 2025

On 12th September 2025, faculty members from JUIT enthusiastically participated in a one-day event at St. Edward School, Shimla, one of the premier institutions of Himachal Pradesh. Dr. Raj Kumar from the Department of Biotechnology and Bioinformatics delivered a talk on “Role of Bioinformatics in Medicine” to around 50 science-stream students. The session was highly engaging and was followed by a rigorous discussion and career counseling. Faculty from various departments also interacted with students through demonstrations and activities, including drone technology (Mr. Manish Sood), civil engineering (Dr. Saurav), and management games (Dr. Tanu Sharma). These sessions were interactive, informative, and designed to inspire students about the future of science, technology, and management education. We sincerely thank St. Edward School, Shimla, for the invitation and look forward to more such opportunities to engage with bright young minds.
