Internal Review and Mentorship Committee (AY 2024-25)

The TIEDC focuses on harnessing the talents and research strengths of different engineering disciplines and applying them to socially relevant projects in startup ventures. The cell also provides technological guidance to budding entrepreneurs to establish small-scale industries and consultation in market assessment.

To review the startup proposals received through the Department of Industries, Himachal Pradesh and provide mentorship to these startups, an internal committee has been formed which consists of our esteemed faculty members with different domain knowledge. The list of members of the internal review and mentorship committee is as follows:
