Organization of an Invited Talk and an Interaction session

CEHTI, JUIT organized an invited talk on the topic "*Detecting False Discovery Rates in Proteogenomics*" on 10th August, 2019. A renowned scientist **Prof. Debasis Dash from IGIB, New Delhi** delivered the talk. Prof. Dash discussed about how false discovery rate can be obtained while dealing with proteomic data. Dr. Dash started the talk from basics and took it to research level. It helped to understand BTech as well as PhD students about the research topic. He also proposed that students should come forward for the discussion so it can help them to grow academically for their future endeavours.

Faculty members, BTech students, and PhD scholars from department of BT & BI, JUIT attended the lecture. Prof. Dash also interacted with the faculty members of the department. Lecture was praised by everybody and lots of information was gained by students, research scholars and faculty members on the same.

After the lecture a souvenir was presented to Prof. Dash by Head of the department, Prof. Sudhir Kumar. It is believed that this kind of interactions will definitely help the students, research scholars, and faculty members to explore new academic and research avenues.

This Event was coordinated by Dr. Tiratha Raj Singh.
