

Report on Outreach Activity at Doon Valley Public School, Nalagarh

Date: 01 December 2025

Coordinator: Prof. Jata Shankar

An outreach activity was conducted on 01 December 2025 at Doon Valley Public School, Nalagarh, under the guidance of Prof. Jata Shankar. The session aimed to create awareness among school students about the diverse academic and career opportunities available in higher education, particularly in the fields of Biotechnology and Bioinformatics.

Around 50 students participated in the session, where they were provided valuable insights into the vast career prospects associated with Biotechnology and Bioinformatics. Prof. Jata Shankar also highlighted the strong placement and internship record of JUIT students, mentioning reputed companies such as Amazon that regularly recruit from the university. This information greatly motivated and inspired the students as well as their teachers.

The students were further introduced to the broader scope of Engineering and allied sciences, including Computer Science & Engineering, Artificial Intelligence & Machine Learning, Data Science, Electronics & Communication Engineering, Biotechnology, Bioinformatics, Microbiology, Civil Engineering, Mathematical Computing, and management programs such as BBA and MBA.

During the interactive session, students raised queries regarding fee structure, hostel accommodation, and the infrastructural facilities available at the JUIT campus. All their questions were addressed in detail, and they were guided regarding the future prospects associated with various programs such as B.Tech, M.Tech, M.Sc., BBA, and MBA.

The outreach activity proved to be highly informative and beneficial for the students, helping them make informed decisions about their academic and career paths.
